Did you know that the first motor car journey on Britain's roads was driven from Micheldever Station to Datchet in June 1895? Well, one of our new members did!

A New u3a Transport Group

It's little known about the U3A that if a member wants to start an activity which isn't currently available, we'll support them to find people to share and develop their interest. New member Paul has spent a career in various areas of transport, and wants to keep learning about it. So he's just set up a Transport Group for us here in Basingstoke, and we've already found twenty other members wanting to join in. They're meeting monthly, and will be covering all forms of transport: buses and trains, cars, boats & planes, and more! Indoor meetings will cover a single subject, with

time to reminisce and chat about issues past and present; but trips to transport places of interest will be in the pipeline too. Do get in touch if you'd like to know more.

And if you have an interest and no-one to share it with - membership of our u3a could be just what you need to get started!

Adding to our Current Activities for those Keen to Learn More

Many of our members still like to study a little and we've a wide range of learning on offer. The Transport Group has joined Science & Technology, Art History, Latin, Literature, Film Studies, History, Local History, Modern Languages, Environment, and Art or Poetry Appreciation. But of course others still prefer to dance, walk, cycle, play games, sports, or join in with some of our arts and crafts groups.

So Do Think About Joining Us and Have a Happy Christmas
